A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

To learn more about the big difference CAC coins can make in your collection visit **CACcoin.com**.

Long Beach, Dealers' Next Port
DLRC Lets The DGS Out

While most dealers are hot on the trail of any desirable early Type coins, some slabs just can't seem to find a home. One example is the 1795 Recut Date, 2 Leaves, Flowing Hair Half graded PCGS F12. This same coin has appeared at public and internet only sales four times in less than a year. Such tracking is much easier today than in the past, especially since this Half Dollar has remained in the same slab for all its recent trades. Not too long ago, dealers and advanced collectors could only trace a coin by close examination and determination of various diagnostics, with the specimen in hand, combined with detailed review of private notes from previous auction catalogs. As you can see by the chart at right, flipping doesn't always result in a quick profit. In fact, the last time out, our example sold for a 9% loss.

1795 Flowing Hair Half Dollar Recut Date 2 Leaves PCGS F12

Sale Date	Auction Company	Price Realized
6/1/2007	Heritage	$4,456
1/7/2008	Stack's	$4,600
1/28/2008	DLRC	$5,175
5/19/2008	DLRC	$4,715

Although many certified generics are traded sight-unseen in volume, with little or no interest actually paid to the coin and only the grade on the slab, all the major services do provide serial numbers on their capsules. One grading company has gone a step further in this regard. Dominion Grading Service, or DGS, formerly PCI, has announced its plan this week to include the letter "D" in the serial number of all coins submitted by DLRC. David Lawrence Rare Coins and DGS are both owned by John Feigenbaum, and his unprecedented policy is intended to show transparency with the grading of their own material. The DGS website will eventually include an innovative population report which allows the viewing of any DGS slabbed coin valued over $100, a feature called AuthentiView. Further, the fledgling service includes Signature Series grading agreements, which enlist the expertise of graders who specialize in a particular coin series. For example, Bill Bugert will focus on Seated Half Dollars, and John Feigenbaum will grade Barber coins and Washington Quarters on request. DGS coins will enter the marketplace very soon, through DLRC sales (of course) as well as Legend's ML Coin Auctions.

The sight-unseen market is not surprisingly on the quiet side as buyers ready for the all important California trip. Silver Commems have taken it on the chin again, in the face of few live sight-unseen Bids. As this week's Market Column will show, several have surrendered double-digit losses courtesy of auction indifference and lower Asking prices. The auctioning of a 1934 Texas Centennial, grading PCGS MS65 and in an OGH to boot, effectively dropped sight-unseen Bid some 21% to $155. Classic Gold is steady at current levels. Rare date Morgans, especially in high grade, are still sparkling and sought by several buyers. Yet, as the attention for the moment has shifted away from the generic cartwheels, several in MS63-MS65 were sold at retail auction for below current sight-unseen Bids. The 1902O does deliver a little spurt, however, as NGC MS66's claim $300. Peace Dollars are sedentary, though a few sold at auction this past week leaving money on the table in spite of higher sight-unseen Bids. As Gold Spot plows back into the $920 range, $20 Libs and Saints are all inching higher in MS61-MS65 as the latter tops a $1,400 blind Bid. Mint State and Proof Type are solid as sellers aren't anxious in the least to part with any of this golden inventory. Mercs are rising a tad as several late date issues grading MS66 and MS67 claim modest upward movement. Walkers are picking up the pace in a solid fashion as a several pound ahead by as much as 30% for the popular 1921, steaming to $3,000 in PCGS MS61. Proof Singles are also on the receiving end of some positive action. 1937 Mercs pick up an 11% endorsement as NGC PR63s roll to $350. Walkers get in the action here too, as 1941 NGC PR66s top $550.

As we go to press, the substantial and eclectic Minot sale by Stack's has completed its first session, realizing a solid $2.7 million. A train of auctions is chugging down the tracks, arriving in Beverly Hills with Goldberg and Superior May 25. Then, it's the Long Beach Expo and Heritage auction, beginning May 28. Next stop is the Bowers and Merena auction in Baltimore, June 5-6, from which we have listed some of the many highlights.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols. "**w**" – Lowest asking price during the week prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

So Cal Auctions Already At $50 Million Hooked On Type In Long Beach

The Long Beach Expo and related auctions are in full swing. Heritage has pulled in $6.25 million from their first session, averaging nearly $7,000 per lot. Superior has added $2.6 million to the pot, and Goldberg's five-session auction, featuring some of the finest foreign and United States coins, hit the bull's eye, bringing in just under $40 million. Their superb array of U.S. material accounted for $10.7 million of this total. Larry Goldberg said the sale was one of the most exciting auction events he has been witness to, and he believes this total is a record for a west coast numismatic sale. While this auction was certainly a hard act to follow, Long Beach set-up day turned out to be very active. For many dealers, it was just a continuation of pre-show business being conducted in hotel rooms, lounges and restaurants—you name it. Buzz from the bourse is that Type is white hot, especially Early Copper and Silver. One well-known east coast buyer confirmed a rousing 6-figure deal during set up. Another veteran southeast dealer was hot on the trail of any denomination of Flowing Hair or Draped Bust coinage. He was ecstatic when he showed us a solidly graded, PCGS MS63 1807 Draped Bust Quarter he purchased wholesale for inventory, at $21,500. Although both Gold and Silver Spot took an almost obligatory pre-show swoon, most dealers that trade large volumes of lower end certified Morgans as well as $20 Saints and Libs were encouraged by continued support.

While the Long Beach Expo runs its triumphant course, the sight-unseen market is busy catering to its ever-expanding niche. Due in part to an increase in visible market makers, narrow spreads between Bid and Ask offer low risk to those buying high-grade 20th Century Type coins. A few examples bear mentioning. A near infinite herd of Type II Buffalo Nickels grading PCGS MS66 is available for $88 per coin. This is backed up by a highly visible and respected buyer willing to pay $84 per PCGS slab sight-unseen. The spread here is a minuscule 4.65%. Late date Full Banded Mercury Dimes offer a similar scenario. In this corner, PCGS MS65FBs cost $38, while MS66FBs can be had for $55. Sight-unseen offers for this material are nearly as competitive at $36 (5.56%) and $52 (5.77%) respectively. On the other end of the spectrum, the always in demand MS61 $20 Libs are flashing a $935 Ask as buyers are willing to pay $895, sight-unseen, amounting to a tidy 4.47% spread. $20 Saints in like grades offer similar margins. Other activity within the sight-unseen arena finds that to no one's surprise, several Classic Silver Commems remain weak. The Classic Gold consortium is faring much better as sellers for this material are not budging from current levels. Although not a fortune, some fortuitous buys could have been had within the Morgan Dollar ranks. With so much preparation devoted to the Long Beach events, some milk money was left on the table. An 1890O NGC MS62 maneuvered past the radar for $23 in the face of a standing blind Bid of $52, some 56% below. Lining up in similar fashion, leaving all over 20% on the shelf, were 1904O and 1878S in NGC MS63, and an 1890 grading NGC MS62. Yet even with this minor disruption, both Morgan and Peace Dollar commoners are still pursued in volume. Mint State Type covers a lot of territory in the numismatic playing field, and as mentioned earlier, buyers are out in force looking to pick up any certified offerings wherever they can. Popular and hard to come by Liberty Seated Halves With Arrows top $6,500 for NGC MS66s. Capped Bust Halves with reeded edge also inch higher as both MS61 products claim $640. Needless to say, the bargain bin has long since been closed here. Ditto for Proof Type as it mirrors this sentiment. Walkers are also feeling the heat, perhaps partially inspired by the rousing performance for a nearly complete set of old green holder material at the recent Minot auction by Stack's. Buyers are lining up for the majority of the keys and scarcer dates. The popular and tough 1919D key pushes ahead by as much as 39% as MS61 Bid reports in at $4,500. Additional dates are tacking on advances in the wake of further demand. Gold Type is relatively stable considering recent unpredictability in the metals sector. Under appreciated Type II $20 Libs take a dual-digit incline to $1,200 sight-unseen for MS61s.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

MARKET EXTREMELY STRONG
AUCTIONS FOCUS OF ACTIVITY

ACTIVITY

across the market

by Kevin Foley

Despite the fact that the economy seems to stumble from one alarming report to another each passing week, the marketplace for rare currency continues to exist in a seemingly parallel universe largely immune from overall economic trends. The two primary trends in paper here recently are especially strong prices for rare material and similar strength for third party certified material in the very highest quality, regardless of scarcity, and this certainly appears to be gathering even more momentum.

Another trend that can only place additional upward pressure on prices, but that is not quite as evident except to those inside the auction trade, is the growing number of internet participants in auctions. Only a decade ago, auctions would have benefited only from in person advance mail and a very percentage of telephone Bidding. In the April U.S. Central States Numismatic Society currency sale conducted by Heritage, of the total prices realized of roughly $13.5 million, roughly $4 million was contributed by internet Bidders. The three participants used Heritage's in house real time internet Bidding platform and similar services are being offered by more and more companies. Unlike outside platforms, in house services do not result in higher buyers fees. It is this real time Bidding that is especially important insofar as its impact on price is concerned. Traditional mail Bids have always tended to be less successful than real-time Bids.

LARGE SIZE TYPE NOTES

Large Size Type Notes continue to attract the largest percentage of total dollars spent in rare currency at auction. Third party certification is increasingly prominent here, with PMG and PCGS having captured the lion's share of that segment to date. The highest grade certified material carrying the imprimatur of one or the other of these firms seems to be selling for higher and higher prices with each passing month. This is true even for the more common material as well as for items that are scarce to rare. Worth commenting on in this regard are two items from the Lyn Knight March 28-29 Chicago CPMX auction: Lot 134 a Fr. 237 $1 1923 Silver Certificate, an item that is quite readily available in any grade from Very Fine U.U. viewed the block with a PMG 68 EPQ certification. Of the 1,062 such items certified by PMG, only nine (the Knight offering) carries the "68" designation and none is graded higher. The realization was an astonishing $3,910 (roughly $887 of CDN "6"). Bid. Another high-end Type Note offered in the Knight auction was a Fr. 1870a $20 1914 FRN Red Seal. Actually the most available of the 14 different Friedberg numbers in this series, the Knight example earned a PCGS 67PPQ designation. Its realization was $13,156.

The Heritage CSNS auction in Rosemont, IL featured the Thomas [illegible] offering, whose strong prices realized and the solid results as strong, that the catalog will become a sought after numismatic [illegible] future collectible in its own right. The space available here simply does not permit doing justice to the significance of this offering's defining overall patterns of marketplace participation behavior except to urge subscribers to read the catalog and compare the results to pre-sale published market levels (summarized Lot Note 1 for $3,000 Legal Tender PMG 64PPQ the only known related example of its number certified by PMG, sold for $9,487, against a $5,000 up estimate. "66" CDN, Bid for the **most common** Type 1 $20 design Type, stood at $1,800 at the end of the auction. One month strong relative to the strength of high quality and scarce certified Notes in Heritage CSNS for 15/08. PMG 67PPQ $20 sold for 12 Legal Tender Notes three certified at the [illegible] level by PMG. It sold for $66,240 against a $50,000 up estimate.

SMALL SIZE TYPE NOTES

Small Size Type Notes in the CSNS auction also displayed considerable strength across the Friedberg numbers and Notes, regardless of scarcity, were especially strong in the highest certified grades. For [illegible] a 1928 Dallas FRBN in PMG 66PPQ sold for $1,528 versus the auction catalog estimate of $4,000. A 1928 Legal Tender PMG 64PPQ sold for $4,194. How in Made in PMG, 64PPQ example, demonstrated the demand for rare and high quality Stars. It sold for $34,500, against a $25,000 estimate. Once again, an extensive showing of extremely difficult to acquire items has resulted in stronger than anticipated results and reconfirmed the breadth and scope of demand for collectable paper particularly at the upper end of the market.

FRACTIONAL CURRENCY

Fractional currency results in the CSNS auction demonstrated the upside potential for this still **undervalued** specialty area. Especially noteworthy was the offering of a Fr. 1307 PCGS 64PPQ "66" Justice Fifty Papos Note. Estimated at $5,000, up it went for $2,300 with a $1,750 CDN Bid applicable to the overall **most common** design Type. For the grade, just how, undervalued scarce and rare Fractionals remain can be suggested from bids not results such as this.

NATIONAL BANK NOTES

The strength of the National Bank Note market was amply confirmed at both the Knight CPMX auction and the Heritage CSNS sale. Items that are rare and/or high grade are at the peak of their historical demand. Ordinary material easily obtained tomorrow if one fails today, is less robust. Rarities especially are selling for numbers that range from very strong to astonishingly so. With an extremely thin supply of material available at any given time the center of even a small number of well-heeled end users can and has repeatedly ratcheted price levels up to new highs.

MISCELLANEOUS

Canadian material in the Heritage CSNS auction sold particularly strongly with this being a sale that may well reflect future price levels in that specialty area.

Active Trading In Baltimore PCGS Handles "Genuine Problems"

With the west coast's triumphs barely behind us, the numismatic nation has traversed to the east coast to set up shop at the highly anticipated Whitman Baltimore Expo. As we are obviously still in the throws of a magnificent bull market, collectors and dealers have been battling for fresh merchandise on the bourse and at the Bowers & Merena feature auction. Highly evident at the recent Long Beach show, problem-free, original, certified coins are still enjoying feverish demand. With unfulfilled want lists firmly in their grasp, dealers have made their way around the bourse, attempting to locate and purchase some of these highly contested jewels. Reports from Baltimore confirm (to no one's real surprise) that early coinage of all denominations, and the better certified Type coins in high grade, remain white hot. Good luck to those on the front lines as they have been looking for replacements to replenish emaciated inventories for some time.

Certified rare coins certainly remain in vogue, partly because of the inherent security, liquidity and accountability through the various well-tabulated population reports. Those in-the-know experts we have talked to confirm that there are still significant amounts of cash just itching to enter the numismatic arena. The problem: securing the top tier slabbed rarities at reasonable levels. As has been very apparent recently, PCGS's old green holders, doily, and rattler slabs, as well as the NGC "fatties" have been enjoying greater demand, and in most instances escalating prices. Several auctions of late have showcased either complete sets or series housed in the older slabs such as the OGH set of Walkers featured in Stack's Minot sale, or the mammoth Teletrade themed sale offering OGH slabs on June 1. In both instances, the majority of these decades-old untampered with coins brought significantly higher levels than contemporary graded examples. Although not all of this first generation plastic is worthy of grade enrichment, the consensus has been that a higher percentage of those older holders represent bargains if they can be had at levels commensurate with their designated grade. Of course, there are no guarantees in this regard. In fact, a number of OGH Walkers have sold retail at auction for below current levels, as seen in this week's Proof Singles section, including a 1940 and a 1942, both graded PCGS PR65, and both retreating 13%. This certainly drives home the notion that it's not just the holder, but the coin within that matters.

ANACS and NGC/NCS have been encapsulating problem coins for years. Now, PCGS has thrown their hat into the ring, announcing that, effective immediately, they will offer a service for such coins. The standard PCGS slab will be used, with the term *GENUINE* printed on the label in place of a grade. The service will cost $100, and, very importantly, the coins will be allowed in the PCGS Set Registry with a grade value of 1. PCGS has also announced a change to their bulk grading service by now only allowing authorized dealers to submit.

Classic Silver Commems continue to have a bit of a rough go as a quintet is exposed to a minimum of double digit losses. Attempting to counter this drift, the ever in demand Lexington-Concord installment is moving up before the whites of our eyes as both PCGS and NGC products chamber up a notch in MS65 and MS66. ANACS and ICG material does report in with a little action too, as the again popular Booker T. Washington Sets of 1947 and 1948 are climbing by as much as 32%. Increases are also seen for select Morgan Dollars in both ANACS and ICG. To the contrary, several generic PCGS/NGC Morgans are drifting a tad lower as MS65s ease back to $132 in the PCGS camp and $130 for NGC brethren. Peace Dollars are fighting off more suitors though, as the scarcer 1923S rides a solid 33% advance to $3,000 for NGC MS65s while the 22D, 25S and 28 are all following her upward trek. Mint State and Proof Type remain in the stratosphere this week. The unheralded, one-year Type 1883 No Cents Liberty Nickel has made an impressive push out of the gate as PCGS MS66 specimens take a 40% jolt to a $510 blind Bid. Liberty Seated Half Dimes, Legend deliver brisk action as NGC MS66 examples roll up a tidy 14%. The Proof Type corner reveals continuing excitement led by the Liberty Seated Half Dimes with Stars as PCGS PR65s ride a 20% advance to $2,760. Diminutive and tough to find Type II Three Cent Silvers are on the receiving end of a $500 escalation for PR65 PCGS slabs. Within Buffalo Nickels, 1929S NGC MS66 examples are up 40%. Mercury Dimes are courting new demand as several scarcer NGC specimens are the pace setters, led by the semi-key 1917Ds encountering a 22% bounce in 64FB. In the wake of a declining Gold Spot, now at $872, most of the common Gold Type denominations are vulnerable, softening further as buyers are willing to wait for the early June gloom to dissipate.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

To learn more about the big difference CAC coins can make in your collection visit **CACcoin.com**.

Summer FUN On The Horizon
Silver Commems Suffer

Courtesy of a somewhat unexpected pre-summer heat wave, all the numismatic faithful were greeted literally with a very warm reception at last week's Baltimore Expo. Although the heat was on, as almost always, the main problem on the bourse was buying the proverbial fresh material that everyone is clamoring for. Bowers & Merena's feature auction supplied some much needed relief in this regard as $6.3 million was hammered home giving those enthusiastic buyers a new supply of certified treasures. Now as both dealers and collectors attempt to get their houses in order, the grueling show and auction circuit leaves very little time to actually strategize for the next event on the numismatic agenda. Those already on the east coast will have two superb auctions to contemplate as Stack's in NY on June 25 will feature both the Bergstrom and Husky collections (of which we have listed several of the many highlights). For some NY attendees, a mad dash after these sales will then be made for the Sunshine State, as the always lively summer FUN show in West Palm Beach, FL will run from June 26-28. Many veteran dealers still haven't gotten used to this rigorous schedule. After all, not that long ago, this time of year was one that meant vacation, or bare minimum, a bit of relaxation, readying for the big ANA mid-summer show. That's not the case anymore. This is and has been big business. Over the last several years as the bull market made itself at home, the finite supply of coins has been met with a virtual infinite docket of shows and sales to deal with.

For new aficionados entering the market, it may seem that there is an unlimited supply of rare coins. Internet only auctions featuring a wide variety of certified offerings are held almost every day of the week by various major firms. The fact is that since certification, many of the *same slabs* have been bought and sold over and over again. Of course, dealers are still adamant in their quest to locate top-end rarities in phenomenal condition for their most passionate clientele. A new group of buyers is said to be waiting in the wings as well, anxious to empty substantial Wall Street coffers in exchange for rare coins. All eyes are still on the lookout for those older virgin slabs from PCGS or NGC as many of these offerings are thought to make the "PQ" classification, while hopefully avoiding the sticker shock of a loftier grade. While hordes of buyers remain in place for earlier versions of the certified plastic, still others have taken a shine to the CAC stickered slabs in filling this quality fetish rather efficiently. Having not yet been on the market for a year, those green and gold CAC stickers indicating solid for the grade or potential upgrade, respectively, are universally finding greater acceptance, and in most instances commanding increasing premiums.

Past habits are hard to break; many of the Classic Silver Commems have descended past the wayside in the sight-unseen market. Leading the slide is the 1936 York County Maine, as NGC MS66s are pining for more action having fallen to $180. Several of the Oregon Trail series have taken the wrong path as NGC MS66 Type rolls back to $165. The solitary bright spot is the whimsical 1935 Hudson issue, inching upstream to $875 sight-unseen Bid for PCGS MS63s. Classic Gold is fairing slightly better, although a handful are easing back after sub-par auction results. Generic Morgan Dollars are still on the soft side, yet several of the Carson City issues are getting a nudge from buyers as sundry PCGS product grading MS64-MS66 climb. Leading the pack are the 1880CC in MS65, topping $1,050 blind Bid, and the 1881CC, at $1,000 in MS66. PL Morgans are making their appearance on a quiet note as only commoners in Choice through PL65 jump a bit. Mint State and Proof Type remain super strong, continuing to bolster the market as they have been for several years now. As the golden arrow is still aquiver, most Gold Type has drifted back further. Early Gold Type features viable Bidders in queue. On the move, 1834-1838 Classic Head Fives are driving an 11% advance to $3,000 for NGC examples in MS61. As for Mercury Dimes, a pair of PCGS MS67FB specimens left substantial money on the table as a 1944D realized $86 at auction in the face of a sight-unseen offer of $140, this nearly 40% under blind money. A 1944D reports a similar fate, reeling in only $98 at auction, some 30% under the $140 that the same sight-unseen buyer is willing to fork over.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

RARE COINS. RARE PRICES.
RARE COMMITMENT.

Auction of NGC-graded Millennia Collection yields excitement, fierce bidding, and record values.

Bidders from around the world drove the total price realized in Goldberg Coins & Collectibles' sale of the Millennia Collection to $23,278,972, making it the highest grossing single-day sale of a World coin collection.

"The NGC-certified Millennia Collection was by far the most astounding and exciting auction in our career. Prices realized were consistently 2 to 3 times the estimate, which was on par with the quality of the material," commented auctioneers Ira and Larry Goldberg.

Before crossing the block, the Goldbergs chose NGC to certify the entire collection. Just a few of the extraordinary results are shown here. You can visit www.NGCcoin.com/millennia to see more of this collection today.

When the greatest collections go to market, they go with NGC.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Proofs. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

CMI Heralds Bull Market
All Eyes Focused On Florida

It must be summer, as that gray overcast malady which blankets the California coastal communities known as "June gloom" has arrived. All dealers and collectors on the west coast are quite familiar with this indigenous phenomenon. Unfortunately, the world economy is mimicking this murky weather pattern to a tee. For those in numismatic circles, it is quite the opposite forecast. Apparently, it's fair weather virtually any time of the year as it pertains to the certified rare coin climate. As we carefully gauge the upcoming season, what is and has been astounding is the amount of cash waiting patiently, or now perhaps not all that patiently, on the perimeter. Many well-schooled buyers sitting on large piles of capital are anxious to disburse their funds into the raging numismatic blast furnace as soon as possible. These Wall Street trained professionals have carefully charted and scrutinized the rare coin venue. Over the last 5 years (and counting), the overwhelming majority of slabs have performed quite admirably even on a sight-unseen basis. A quick glance at the *CCDN Coin Market Index* from 2003 to date, herein, shows the overall market is up nearly 20%. Both Gold Types, Mint State and Proof, are the biggest winners, followed by the ever-popular cartwheels. Buffs, Mercs and Proof Singles didn't fare as well, showing declines from five years ago, but all the others are showing gains. Certainly, the staying power of this bull market has left little time for the average dealer or collector to sit on the sidelines contemplating a purchase. Original, jaw-dropping quality material is so desirable that when offered at any public venue, it is snapped up faster than homemade cookies at a bake sale.

As the majority of the upcoming rare coin extravaganzas are scheduled in Florida and Maryland, considerable numismatic muscle will be flexing on the east coast, right through the highly anticipated summer ANA just a little over a month away. As we have touched on previously, dealers and hobbyists not wanting or able to wait for the big shows can get their certified coin fix almost any day of the week. Major firms are now holding larger and better internet-only auctions. In addition, more and higher quality slabbed material is being offered on the electronic dealer trading networks, including a Classic $2½ Dollar set for $11,250, and a collection of 3 Cent Nickel Proofs for $57,500. Perhaps this is the result of dealers attempting to fill their coffers before the next big show, possibly featuring treasures that higher Bids have finally forced from collectors' hands.

While Classic Silver Commems are clearly up from five years ago, they currently continue to drift back, yet none are experiencing a huge smack down. On the positive side, the 1925 Lexington-Concord installment moves higher, with PCGS MS66s capturing a $990 sight-unseen Bid. The Classic Gold ensemble maintains decorum with only the 1926 Sesquicentennial rolling back a mite for NGC MS64 examples. Truly generic Morgans are spied declining just a smidgen due to subpar auction results. Peace Dollars aren't willing to relinquish much ground, though, as only the inaugural 1921 high relief is down for PCGS MS65s to $1,750. Making a bit of noise, the scarcer 1922D delivers a blind offer of $850 for NGC MS66s, and the 1922S counterpart, also in NGC, pounds ahead to $1,050 in Gem. Mint State and Proof Type are still very sound as buyers look to ambush a supply of quality, eye-appealing fresh material within this market segment. As Spot Gold rebounds back into the $900 club, we observe that common $20 Saints are marching to $915 in MS62 and $925 in MS63. The dated Saints are also holding their own as the slightly better 1910S locks onto an $1,800 sight-unseen Bid for MS64s. Buffalo Nickels deliver a small herd of common NGC slabbed MS66s as much as 11% higher to graze on a $60 Bid, though several MS66 PCGS generics have drifted back to as low as $62. Mercs maintain a soft spot at auction, allowing several to explore lower Bidding terrain. The attractive and relatively short series of Standing Liberty Quarters reveals stability for the most part.

Those dealers not able to buy enough rarities in New York at the June 25 doubleheader auction by Stack's will get another chance in Florida, as Heritage's Signature Sale will run June 26-29 in conjunction with the Summer FUN. We have listed several of the numerous highlights for your perusal.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

To learn more about the big difference CAC coins can make in your collection visit **CACcoin.com**.

Stack's Doubleheader Delivers $11.5 Million Summer Ushers In Sizzling Market

What an exciting time of year. Now that is definitely a sentiment that wouldn't have been shared amongst most veteran dealers or collectors in the not too distant past. The summer season had been a time to put on the brakes, a perceptively slower time in numismatic circles. Apparently, the surging bull has virtually eliminated those lazy days. Instead, the certified rare coin market has just completed an amazing period to usher in the first full week of summer. There just isn't any letup anymore. Keeping things at a fever pitch, a phenomenal doubleheader auction completed by Stack's June 25, featuring the Bergstrom and Husky collections, realized an amazing $11.5 million. Perhaps more astonishing, the auction on the Husky side was complete sell-through. An astounding $9.6 million was hammered down, with 30 of the 115 lots eclipsing the $100K level. The average price per lot, including buyers' fees, rocketed over a $83,000. We have listed several of the many highlights for this sale, which confirms emphatically that rarity, coupled with high quality, has practically no boundaries.

David Lawrence's Thursday night internet-only event had a bit of a historic ring to it as the sale included 100 DGS (Dominion Grading Service) slabs. With just over 1,500 coins submitted and graded under the auspices of the revamped PCI label, nearly 7% of the fledgling service's total product was made available at the auction. The key offering bearing the DGS moniker was an 1836 Gobrecht Dollar, a superb piece graded PR45. Teletrade is blazing in with their own Friday night special sale featuring a sizable selection of older slabs, which are clearly gaining more and more popularity. Some highlights included a 1796 Stars $2.5 Draped Bust NGC AU50; an 1879 Flowing Hair $4 Stella PCGS PR62, and a 1795 Draped Bust $10 13 Leaves graded NGC MS61.

The heavily attended Summer FUN show in West Palm Beach, Florida, is underway June 26-28. Reports from the floor indicate an active bourse attempting to rival the steamy weather outside the convention center. As usual, the buzz was intense during set up as dealers attempted to snare virtually anything that just left the numismatic bakery. Yes, freshness and originality are still scoring big points and higher offers. Pristine early Copper Type is red hot as buyers canvass for full Red Half Cents and Large Cents of all styles. Demand for better dated Morgans has also intensified, and get this, a few well-known buyers are actually in the hunt for some original PQ Classic Silver Commems. Early Silver Type is a heat-seeking missile as buyers attempt to lock in on the coveted Flowing Hair, Draped and Capped Bust examples. Early Gold Type is also the hunted as buyers from coast-to-coast have hordes of customers waiting not all that patiently anymore to have their want lists filled. For many dealers, the demand for five and six-figure specimens continues as many affluent clients clamor for their fill of certified rarities. Of course the economic climate bears watching as the Federal Reserve's decision on 6-25 to leave the key interest rate unchanged at 2% has left the door wide open for a long overdue adjustment on the upside as inflationary fears heat up. At least for the moment, the precious metals have more than held their ground as Gold Spot has powered back over $915 with generic Double Eagles getting a boost.

The veritable dumping ground that has been occupied by the Classic Silver Commems is still with us, yet is not as much of a numismatic eyesore. Silver issues are beginning to see some increased interest, especially when original Gems are offered at current levels. Not out of the dog house totally, a trio led by the attractive MS65 1935S San Diego is caught slaloming down around 25% after a CAC certified PCGS slab was auctioned off for only $81 in the recent Legend auction. Cleveland and Norfolk entries are also drifting back after this material was sold at retail auction for significantly less than estimated. All of these examples can be confirmed in this week's Market columns. Classic Gold maintains Bidder continuity as no bargains were offered up this week. Demand for common date Morgans is solid, and the better dates remain desirable too, as the last San Francisco issued Morgan of 1921 will attest. NGC MS66 examples of this tougher conditional rarity top a $3,200 sight-unseen Bid. The Peace Dollar corps maintains vigil at or near current Bid as no one is anxious to part with the majority here. Mint State Type revealed nary a bargain, yet Proof Type, while still extremely strong, served up a small entrée after an especially attractive PCGS PR65 CAC stickered 1882 Shield Nickel was let go at the Legend auction for $575, while a standing sight-unseen Bid of $600 for any old PR65 watched.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

To learn more about the big difference CAC coins can make in your collection visit **CACcoin.com**.

Metals Skyrocket For Independence Day Red, White And True Type Wanted

Although summer is in full swing, and the great, all-American holiday is upon us, the certified rare coin market hasn't had time or opportunity to take any days off. Instead, the Bidding blitz targeting various certified red, white and true numismatic offerings continues to escalate. As we touched on previously, there just doesn't seem to be any substantial lull or down period any longer. Regrouping within the numismatic fraternity is usually accomplished after attending various shows and public sales. Now, this previous downtime is being taken up as well. When these weary travelers finally make it home, they find almost every day of the week another internet only sale just an enticing click away. Couple this with the various home shopping coin shows on the tube seemingly 24 hours a day, and there's no escape.

As the market remains hotter than 4 alarm chili, new enthusiasts are looking to see what all this hubbub is about. Before you know it, another coin hungry collector has been hatched, making a trip to a local or regional show, anxious to have his/her want list fed. The wave of new participants will have a learning curve to overcome, though, and once the growing pains have subsided, it's straight to the back of the line. At the pole position, the well-versed and affluent patrons have carefully plotted the terrain and have eyes and wallets set on those ultra rare and mind boggling treasures. As those fresh from the FUN show will attest, demand for certified early Type is as robust as ever, and the supplies which had been thin are now all but invisible. Dealers just wish they could declare independence from the rare coin shortage. Adding more fireworks to the equation, Gold Spot has pushed past $940, up 11% from a 3 month low in May, and Silver is shining over the $18 level. Strong precious metals always bring in more adventurous souls along with increased volume of inquires to dealers about more than just bullion purchases. There is certainly no shortage of business or potential sales on the immediate horizon. Whether the certified coins coming up for sale have been recycled plastic or not, they should have new waiting homes. Slowdown in the economy? The prevailing coin stimulus program saw millions of dollars eagerly exchanged during an amazingly active June. Major public auctions were responsible for nearly $30 million, and some larger all-encompassing internet only sales have raised that bar even higher, to over $37 million. All of this transpiring during the so called quiet time in the rare coin arena.

The summer solstice reveals much about this market's staying power in the face of the less than amicable overall economic forecast. For most dealers we have talked to, liquidity is not a problem; location of prime numismatic real estate is. With only a few short weeks left before the annual Christmas in July numismatic gathering, better known as the summer ANA, dealers will strategize in hopes that much needed material will appear at the big Baltimore hootenanny. Until then, the sight-unseen market will serve to help dealers get their houses in order. Classic Commems deliver the truly independence-themed Lexington-Concord, firing one of the first shots of freedom. The iconic Minuteman has taken the recent enthusiastic Bidding salvo to arms as PCGS MS65 and MS66 caliber coins top off at $420 and $1,010 respectively. Unfortunately, a duo including Oregon and Boone Bicentennial Type drift back by double digits after a less than patriotic appearance at the FUN auction. Several within the 11-piece Classic Gold brigade have also retreated. Both Lewis & Clark entries housed in NGC MS65 holders are exploring lower terrain, led down the path some 17% for the 1904 entry, and 13% for the tougher 1905. The apple pie of the collecting community, Morgan Dollars, are still in great demand, and although several have eased back a tad, the sight-unseen market for generics and better dates remains robust. In fact, a handful of ICG and ANACS Morgans are going up by as much as 18%, with the star being the 1879 ICG in MS64. Select, original GSA Dollars in NGC MS65 grade wrappers are also on the rise. Peace Dollars second the motion as the tougher 1922D in NGC MS66 tops an $875 blind Bid. With Gold Spot firing back over the $940 level, the $20 Libs and Saints have gotten onboard. Several well-known market makers have already informed us that the goldbugs are rearing their heads as inquires and sales have heated up. Mint State, along with Proof Type, is still enjoying their turn in the driver's seat as few bargains were had during the recent end of the month auction assault. Mercs and Walkers are holding their own while Proof Singles are taking a slide. Buffalo Nickels are again featuring renewed interest as the generic 1938D delivers parity between PCGS & NGC in MS66 at $60 sight-unseen. All in all, a dazzling display of strength is still sparkling up the sky this 4th of July.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

MidAmerica Keeps Rare Coins Hot
Final Tune-Up Before ANA

Continued heat generated by the numismatic front is still taking some observers by surprise. As summer progresses, most dealers we have conversed with while in Middle America have confirmed this amazing run still has ample legs. Presently, the proverbial heat is cranked up in Schaumberg, Illinois as much of the coin nation is wheeling and dealing in that Chicago suburb at the MidAmerica Coin Expo, running July 10-13. Exhausted buyers were also fiercely competing for any fresh certified offerings via Stack's Vincent Collection held in conjunction with the show. Most participants franticly scouring the bourse and auction consider this the final trial and tune-up before the Olympiad of numismatics gets underway. Ah yes, the World's Fair of Money is just a few short weeks away in Baltimore, MD July 30-Aug 3. Strong competition for any quality certificd offerings is therefore bound to accelerate in the few weeks before the "hobby of kings" crown jewel commences.

Big-time buyers and vest-pocketeers will be migrating to the east coast in earnest over the next fortnight. With aging and ever-lengthening want lists in tow, the first attempt to feed the slab-starved patrons will be courtesy of the Spink-Smythe USA Summer Rare Coin Auction, July 22 in New York. Shortly thereafter, the Bowers & Merena Baltimore Rarities sale will be held, July 26. The same day, Superior's Elite coin auction will endeavor to whet their appetites with an appetizing array of certified offerings. Next up in Baltimore is Stack's, with the Samuel Berngard and SS *New York* collections July 27-28. Finally, Heritage will feature their tremendous Signature Sale, July 30 through August 3. Of course, prior to PNG Day, most heady buyers will be transacting business in their hotel rooms, restaurants, down by the waterfront, or while taking in a ball game, as well as the more conventional meeting rooms.

Perhaps now, more so than any other ANA in recent memory, this will be *the* show that will define their 2008 campaign. Buyers are banking on the fact that the absolute crème de la crème will be offered. They also are cognizant that price tags will not be light. Early preparation, sound liquidity and bold action are requisites for achieving exemplary results from the opportunities presented. For many hoping to snare fresh, eye-appealing material, conventional wisdom must be replaced with cobra-like reflexes, and no fear of sticker shock (CAC or otherwise) if buyers are to win at this grueling end-of-month marathon. For some dealers, cash reserves are not a concern as the rare coins which the funds have been allotted for are still readily available. For others hoping to reel in the big one, it wouldn't hurt to strengthen their cash coffers heading into Baltimore. The effective and painless electronic trading networks are a way to keep cool while completing a transaction or two without venturing out on the road. Although activity is on the abbreviated side, as would be expected this close to thc ANA, there are still staunch supporters raising the ante in sclect arcas. Classic Silver Commems are not yet out of the woods. The 1892 Columbian Exposition is unfortunately charting previously unknown waters as Columbus discovers a sight-unseen trade for an NGC MS67 example at $1,500. Classic Gold offers a bit more decorum as only the 1903 McKinley grading NGC MS64 is caught in a scuffle easing back 13% to a $1,000 sight-unseen Bid after an internet-only auction appearance. Silver Dollars are still being scarfed up in volume at designated levels, although a sprinkling of generic Morgans were observed drifting back a tad. Retail auction sales were the main culprit leaving as much as 13% on the table in the case of an NGC MS65 1921D $200 Teletrade sale staring blindly in the face of a standing $230 offer. Peace Dollars remain tight with buyers at currcnt levels as not a one hit the bargain bin. As Silver Spot peers over $18, demand for MS61 and MS62 material is growing. These slabs are Bid just a tad over melt at $17 and $18 respectively. The perpetual darlings to the ball, Mint State and Proof Type retain their crowns as buyers fcverishly look to add more of these winners to their inventories in time for the big dance. The yellow metal enjoying $945 plus Spot is encouraging more goldbugs to come out from hiding. While lower to middle grade Double Eagle Saints perch slightly higher, the next to unheard of Type I Gold Dollar making the NGC MS67 grade, are bouncing up $800 on the way to a $13K sight-unseen Bid. A trio of better date Washington Quarters is each flashing a double-digit gain as the 1940D and 1936S in NGC MS65 lead the way, rolling to Bids of $150 and $175 respectively. (This attempting to stem the tide after the keys—1932D and 1936D—each surrendered dual-digit losses.) Proof Singles delivers some positive news, as the popular 1936 Brilliant Proof Buffalo Nickels grading NGC PR64 graze on the hooves of an 11% jaunt to $950 Bid. As the action heats up for the coin nation, this could very well be a summer for the record books.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. are strictly the responsibility

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

In addition to its world-class conservation service, NCS provides comprehensive certification services for coins with irreversible detrimental surface conditions (commonly known as "problem" or "no-grade" coins). All coins encapsulated by NCS are authenticated and guaranteed to be genuine. At your request, coins can be described on the holder as Genuine, or given a Detail's grade.

Any item submitted for NCS encapsulation that is suitable for non-problem coin grading will be transferred to NGC. Extensive variety and error attribution services are also available.

For more information on NCS Certification and Encapsulation, please visit www.NCScoin.com.

NCS coins are approved to be listed as certified on eBay.

Rare Coins Don't Take Holidays
Proof Type Mirrors Strong Demand

With the summer season in full swing, most families have allotted some time for their annual vacation. However, in the coin family, the rigorous non-stop schedule of the professional numismatist can often raise havoc, voiding the best of these more traditional plans. Presently and effectively since the dawn of the new millennium, this raging bull of a coin market hasn't been suppressed, caged or put on hold as rare coins aren't taking any holidays. For most dealers, it has been a highly profitable yet nomadic adventure—an arduous road lined with customers, want lists and never-ending internet auctions. It has been overwhelming, yet most are still plugging along from one show to the next. Some dealers have finally given in, actually foregoing the almighty dollar, temporarily at least, for a few well deserved days off before the big ANA show commences. Not at all surprisingly, the extended numismatic forecast remains the same; it's gonna be hot.

The frenzied quest for eye-appealing, certified slabs continues without missing a stride, on the heels of a better than expected Midwest show. Most attendees that we tracked down report business is still great. The ongoing problem is that the supply train of rare and desirable certified offerings has all but boycotted their appearance on the bourse. Top quality slabs just aren't available with any consistency. Key market makers have been cognizant of this fact as the finite provisions can't begin to satisfy the infinite volume of demand. The hopeful consensus is that a wealth of the tremendous quality and top tier rarities will be making their appearance at the grand numismatic gala in Baltimore. As we have said in past reports, and it does bear reiteration, there are vast coffers of cash anxiously waiting on the sidelines. These well versed and well heeled buyers are targeting those absolute top notch treasures, many in the six-figure plus category. On one hand, some of these investors have made the transition quite quickly into collector/investors. On the other hand, some have been easily confused and jaded, having likened the rare coin acquisition process to putting in a buy order for a stock or other property. Just call a broker or simply click online and voila, instant gratification. Not so in this finely-tuned arena. Just because something exists doesn't necessarily mean that it is available for sale presently or in the foreseeable future. Competition is therefore expected to be turned up a notch in the final stretch before the ANA, commencing next week. Four auctions are on the docket beginning with the Spink-Smythe USA Summer sale July 22 in New York, before culminating in Baltimore where Bowers & Merena, and Superior will host sales on July 26. Stack's follows July 27-28. Heritage will take the anchor leg with its ANA Signature sale July 30 thru August 3.

A trio of Silver Commems is led lower by the 1936 Elgin's slide after a PCGS MS64 product had a less than superior auction appearance. Classic Gold is fairly stable, although the 1903 Jefferson is easing back a trifle for MS64 specimens. Silver Dollars maintain overall muscle with Bidders as only a few Morgan commoners are off a tad. Type is still smoking hot as the Mint State side offers up reduced Capped Bust Quarters at the elevated blind Bid of $5K for MS64 slabs. Proof Type is the absolute showstopper, with a trifecta of double-digit gains, including the Type III Three Cent Silver grading PR66 and claiming $1,600. The scope of the demand is widespread as a plethora of Nickel and Silver varieties are on the receiving end of moderate boosts. Early and high-grade Buffalo Nickels are causing a minor stampede, too. PCGS keys like the 1921S grading MS65 top $5,600; the popular 1913S T2 rolls to $5,900 in MS66; and the 1914 grading MS67 tops $4,200 sight-unseen. Gold Type is marked with increased demand as a host latch onto an average bounce of just over 4%. Generic $20 Saints march higher, yet MS61 slabs are still Bid near melt. Of course, dated Saints are always in vogue, and leading the flurry we find the 1909D bolting in a trio of PCGS columns by as much as 25% for MS61s at $2,250; $3,200 for MS62 versions, and $9K tracking down MS64 examples. Rounding out the spirited action, Type I Standing Liberty Quarters deliver a pair with modest gains, and even Franklin Halves feature a double-digit push chasing the 1963D grading MS65FBL at $50. We have listed a few of the many highlights from the Pre-ANA Baltimore sales.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

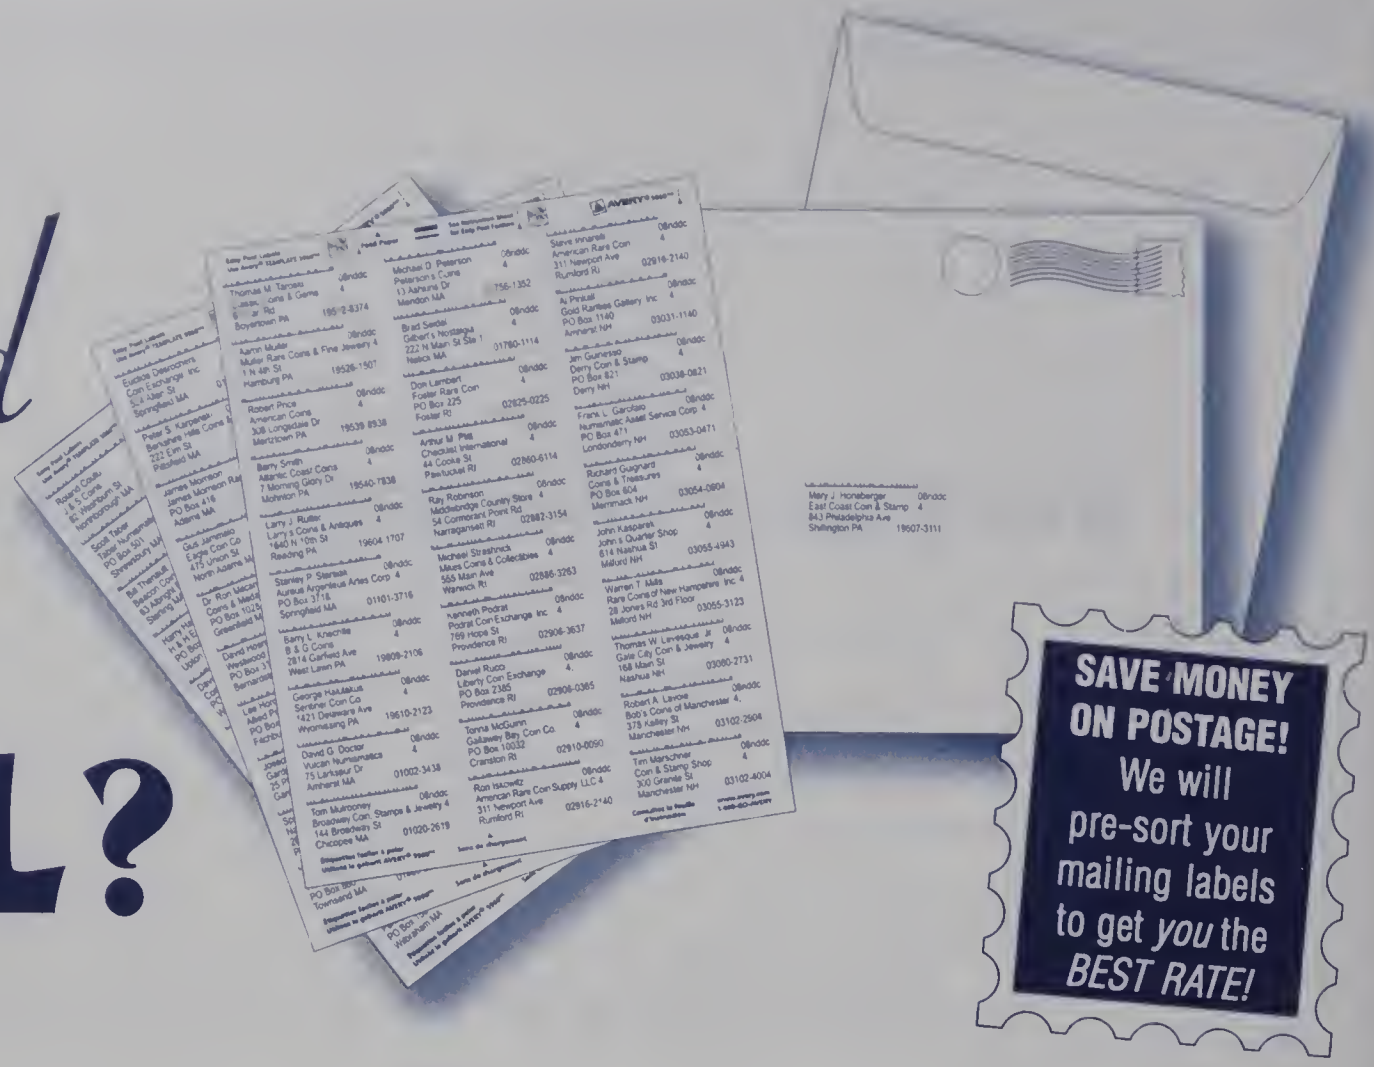
Need to **MAIL?**



Need to contact America's leading numismatic dealers? Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the

2008 Numismatic Dealer Directory™

are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000+ current names and addresses. And ***current*** is a promise taken seriously — the database is updated ***daily***. All for only $325 — well below the mailing industry standard of $75/thousand.

To make this offer even more attractive, labels are available in both First Class order or Presorted for Basic Bulk Rate mailings (you can save more than $930 over First Class postage stamps!). Need just one state or region? Need a trial sample? Contact us for details!

YES, I want to order mailing labels averaging 5,000+ names from the 2008 Numismatic Dealer Directory. I understand that my $325 fee entitles me to only one usage of these names. _____signature

Baltimore Extravaganza Begins
Metals Melt Under Mid-Summer's Heat

Just about every knowledgeable collector worth their salt aspires to be on the east coast, in particular, Baltimore. The Old Line State is thick with excitement and is bubbling over as the big annual 117th ANA World's Fair of Money is less than a week away. The numismatic world's Christmas in July has many collectors finalizing wish lists and either taking them along or communicating their needs to trusted mentors. Many veteran buyers have already evaluated their needs in advance, having scoped out that substantial pre-show string of auctions. Some anxious dealers already setting up a temporary headquarters in Baltimore have confided to us that there is some apprehension escorting them into this show. Like no other event in their recent collective memories, this can truly be a make or break scenario. It may turn out to be the most successful show of the year for many, so the pressure is on to locate and purchase fresh slabbed material to satisfy not only the excited collectors, but to infuse new blood into those anemic inventories.

Certainly for many within the affluent collector click, money will not really be a concern. What is of real concern is quality, rarity and pedigree of those rare certified treasures. Key dates from virtually every series, as well as the prime numismatic real estate encompassing all Flowing, Draped and Capped Busts, will be hunted down like escapees from Devil's Island. Six-figure and better numismatic icons will likely trade rather freely at this gala. For the novice, the advent of the CAC product will make their hunt perhaps a bit more costly when they latch onto that stickered slab, yet the satisfaction that this coin is at the very least solid for the grade will let the new hobbyist sleep soundly when they get home. Buyers are also keeping faithful watch on the metals arena as extreme volatility has seen Gold spike to over $975 per ounce last week, only to see it flounder on July 24 to just over $920. While dated and early Gold Type is not dramatically influenced by these swings, generic $20 Saints and Type III Libs are.

A quick perusal at this week's market column for the Classic Silver Commems will reveal that only a handful of mixed offerings are easing back, this being the result of lower Asks and auction results. The only double-digit loser is the tough 1939 PDS Arkansas Set, finding NGC MS65 sets in the hole by 15%. On the flipside, the ever popular 1925 Lexington-Concord is called to arms as MS65-66 examples set their sights on sight-unseen Bids as high as $430 and $1,030 respectively. Although Spot Silver has dipped below $17.25, the appeal and demand for Morgan and Peace Dollars goes unchallenged. Only a few from each series traded for a tad below blind Bid, and most of those have highly visible acquaintances ready to take all they can at current levels. A few generic Morgans are actually moving up in MS65 to $131. Type, both Mint State and Proof, is still hot, and no one is giving up any bargains here. Although Gold Type is beset with a few minor setbacks, all three Gold Dollar Types are apparently mocking the recent Gold Spot back step. Type I NGC MS65 examples top $3,600 Bid, and tough Type II specimens get some pop as those graded PCGS MS64 roll to $13K sight-unseen. The lone auction outside of Baltimore is in the books as the July 22 Spinks-Smythe offering in New York realized a tidy $460,000. The marvelous 8-session Heritage Signature Sale and Platinum Night gets underway on July 30. We have listed several of the multitude of highlights.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Bourse Buzzing In Baltimore Original Rarities Rule

The granddaddy of all numismatic events is running full bore as dealers, collectors and investors of all shapes and wallet sizes are rendezvousing in Baltimore. This World's Fair of Money may very well be one for the record books. With so much pre-ANA action, it's difficult to discern where the preliminary proceedings end and the main course begins. There certainly has been no shortage of action on the sizzling east coast. Leading up to the big show, buyers had the opportunity to view thousands of certified coins which were hammered home in a trio of Baltimore based auctions for over $26 million. The lion's share of the proceeds were awarded to Stack's, as the auction house's diverse and eclectic offerings from the Berngard sale included tokens, sunken treasure from the SS *New York*, and the electrifying sale of perhaps the finest known Draped Bust Small Eagle Half soaring to a new home for $1.4 million. This exciting sale captured over $20 million just days before the big affair itself. Amazingly, 32 rarities from the auction captured over $100K each. Half of that total, 16 impressive pieces, cleared the extraordinary $200K per benchmark. These 32 coins reeled in a colossal $8.5 million, accounting for over 40% of the total receipts.

Will there be enough cash remaining for the bourse and Heritage auction? Those on the floor we caught up with replied with a hoarse, yet resounding, yes. Even after this gargantuan expenditure, most have not begun to fill all the voids, saying they have plenty of available cash remaining to achieve their goals. This must be true considering that, as we go to press, Heritage's signature event has hammered home over $5 million after only 2 sessions. PNG Day on the 29th was also quite stimulating as the influx of guild members, early bird collectors, and non-PNG brethren made a mad dash to a well-known dealer's table to get a shot at a fresh Capped Bust Half deal. Walkers from the short-set were also hot, which may account for the increases in this week's sight-unseen Bids for ICG slabs. By the conclusion of the day, most participants were exhausted after a solid mix of strong wholesale and retail business was conducted. After dealer set-up, the massive bourse, which could conceivably house several aircraft, has been buzzing from opening bell to closing. Buyers are scampering from table to table tracking down leads on any early federal material in Copper, Silver and Gold. One dealer advised us that he had wrapped up a wholesale transaction for a trio of PCGS MS64 $3 Princesses, two 1887 specimens and one 1888 for $34K. We spoke with a buyer who told us he is hunting down just about anything still in a first generation NGC Fatty or PCGS Old Green Holder, hoping to get some extra mileage out of those perceived stricter grading standards. All key dates from just about any series are being targeted too. An enthusiastic Dollar specialist said he was anxious to get his hands on "CC" Morgans as well as those tough New Orleans issues of 1893-97.

The sight-unseen market is also quite active as the desire to conduct business even while on the bourse has its advantages. As usual, Classic Silver Commems haven't knocked the socks off many buyers, although only a pair, including the 1934 Maryland grading NGC MS67, has eased back to $1,150. Silver Dollars maintain their solid standing as the 1884O MS65 DMPL has taken more of a shine with buyers with a $425 blind Bid. As has been the situation for sometime, Mint State Type offers no bargain fares as MS61 Trade Dollars move up to $475. Proof Type sings the same refrain as With Motto Liberty Seated Dollars stand tall in PR65-PR67, with the latter reflecting a tidy $24,500 sight-unseen Bid. Although Gold Spot has bounced all over the place, even dipping below the $900 benchmark in intraday trading on the 30th, it's now back up to $915. $2½ Indians, $10 Libs and Double Eagles are still in good with buyers as subtle advances are noted. The queen of the Gold ensemble is definitely the elegant High Relief as MS61 pieces take a $400 jump to $12,500, and MS66 examples are up over 11%, muscling to $70K sight-unseen for NGC slabs. ICG Double Eagles are showing healthy numbers in the generic big market this week, as are Walkers, Peace Dollars, Mercury Dimes and Buffalo Nickels. Clearly, ICG has benefited from their recent inclusion in this trading medium.

NGC has revealed details of their newly designed holder which will be used beginning in late August. Anti-counterfeiting features include a UV-light responsive watermark and a state-of-the-art hologram which will be fused directly into the back of the holder. CAC, which has quickly become a household name in the world of numismatics, has recently reported some remarkable numbers. In less than a year of operation, the service has already processed 49,472 coins valued at over $289 million; 24,804 of which have received the green bean, and a mere 85 a gold sticker. A single dealer has placed over 20% of the entire gold sticker population with buyers as opposed to upgrading.

PROFESSIONAL NUMISMATISTS GUILD, INC.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

To learn more about the big difference CAC coins can make in your collection visit **CACcoin.com**.

Gearing Up For Fall Campaign
Sight-Unseen Marketplace: A Trading Powerhouse

The heat and hoopla surrounding the eventful ANA may be over, yet the searing problem of finding fresh certified material remains at the forefront. Of course dramatic sales of various Price and Rollins monster material had appreciative yet shocked attendees gasping as they watched the hammer prices for these amazing numismatic artifacts go through the roof. The fire and passion of the moment found many would-be buyers at a loss for words, but not cash. Successful Bidders knew going in that they would be in a financial fire fight, and they came to win. One astute buyer said after placing a victorious Bid in the quest for an Ed Price coin that prices are no longer to the moon; they're going to another planet. Amazingly, after thousands of lots were scrutinized in person, on the bourse and even on live internet feeds, dealers are still putting out the SOS (Send Out Slabs) on the various electronic trading venues.

A quick glance at the ANA Heritage signature sale reveals a solid indication of just where this market is. Although over 6,400 items were auctioned off, the average coin generated virtually an equal $6,400 per lot. The consensus was that if a PQ coin was on the roster, it wouldn't get overlooked even in a sale of this size. Although recycled plastic at the major venues may be a problem, volume hasn't suffered. As a matter of record, this 2008 sale was nearly equal to the combined lots offered in both the 2006 and 2007 ANA signature events. Heritage Auctions, the principals of which reportedly own a sizeable portion of NGC, has announced that coins valued at $50 and higher will be graded by ICG free of charge for those who consign at least $5,000 worth of material during September.

As most dealers reflect, strategize and pay the auction piper, plans are already being made for the fall campaign. With over a month before the big west coast madness takes center stage, many of the numismatic faithful will pay a visit to local and regional shows. The various electronic trading networks are sure to get a solid workout as well. The Big Generic Market is still churning out trade after trade. Since its inception a little over 9 months ago, nearly $17 million in business has been recorded. Just how much of an impact has this had on the sight-unseen trading on CCE overall? Consider this: from Jan 1 through August 6, the 2006 sight-unseen transactions totaled $928,421; the same period in 2007 tallied $1,002,686. The sight-unseen juggernaut through August 6, 2008: $11,858,028. Keep in mind, these are sight-unseen transactions where the only thing that matters is the label. Such volume clearly shows the huge demand for product with liquidity, convenience, and most importantly, end-user salability.

Classic Silver Commems are still on the fence with many buyers. On the heels of auction mania in the Old Line State, many more have fallen off the railing. On a dollar basis, the big loser was the 1922 Grant With Star, as a less than inspiring NGC MS67 example fell to the hammer and realized 18% below previous Bid, reeling back nearly $5K to $21,300. Classic Gold has also felt the pinch, as no fewer than 11 assorted slabs are coming up short in the double-digit brigade. Topping the slide, the key to the 11-piece ensemble, the 1905 Lewis & Clark, lost their bearings as an NGC MS67 example declined with Bid falling to $41,500. A PCGS MS67 slab also dropped, as the Pan-Pac Quarter Eagle is now nesting at $12,000. Morgan Dollars are still hot with only a few minor losses to report. Generic Proof-Likes are inching up, and Peace Dollars deliver a minor advance for commoners in MS64 and MS65. Mint State Type and Proof Type maintain a strong showing, although a PCGS PR67RD Indian Cent lost some wampum, drifting back to $3,555 blind Bid. A 1909 Liberty Nickel graded PCGS PR66 was one of the few to leave any money on the table as it sold at the Heritage auction for $633 in the face of an active sight-unseen offer of $750. Generic Gold Type has wilted in step with the yellow metal's dip to $870 Spot. Nonetheless, most Gold Type in MS65 is still holding strong. Richard Nachbar's sealed-Bid farewell sale, conducted at the ANA, was a resounding success. Laden with green and gold CAC stickers, this tableside venture realized a tidy $486,836. We have listed several of the highlights.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 15,000 coins with an estimated value of $100 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep mirror Prooflike. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XXIII No. 33 | August 15, 2008 | Single copy price $4.00

Walkers Make A Run For It
Sight-Unseen Trades Surpass $125 Million

It's still amazing to scores of buyers that, considering all the certified material that comes down the pike, there can be such a severe shortage of coins in so many categories. The problem, in large degree, is that so many of the certified slabs have been recycled so often, it's like being stuck watching a perpetual TV rerun—you can't wait until the new season begins. The plain truth is that the numismatic road show is on hiatus. The finite supply of fresh, problem-free Type material and rarities is extremely limited, thus ensuring more than a bit of déjà vu when that seasoned buyer encounters a certain coin or coins on the bourse or auction venue. Part of the reason for this shortage is the reliance on auction prices realized to motivate collectors to bring their better material to market. The problem is, most collectors know that auction results don't guarantee their coins will get a similar result. What will flush choice holdings out of tight hands is higher, published dealer Bids that in fact do guarantee a profit for the seller.

Of course, most dealers and well-heeled parties are not on the prowl for average wayward coins; they are hunting for quality, rarity and value. Whether the prospective coin purchase is made with a stimulus refund or as a six-figure investment, superiority, eye appeal and originality are prerequisites. To the rescue is the new kid on the block. Although not quite a year on the scene, CAC certification has eased the pain and anguish of some gradeflation. In relatively short order, the CAC sticker of assurance is *insurance* enough for the novice or even major player, effectively squelching out the grading jitters and buyer's remorse. As long as that holder has the little green or gold bean, buyers are usually more than willing to take that slab into the fold, likely at higher levels and in many cases sight-unseen.

As for sight-unseen trading, consider this staggering number: during the first week of business last month, the electronic trading network workhorse, CCE, logged in a trade that pushed total sales past $125,000,000. Mind you, this figure represents only sight-unseen transactions. Back in 1990, a solid $20.7 million in sight-unseen trades was reported, and PCGS product had a 10:1 ratio over NGC. The average dollar amount per trade back then was $1,260. Now blast forward to 2008, and my, how things have changed. Not only are NGC slabs out-trading PCGS material, the typical trade, courtesy in part to the Big Generic Market, is an average of $5,200. This trading platform, launched November 1, 2007, was created to allow trading of an infinite number of coins per transaction and offer increased transparency, in hopes of bringing in Wall Street money. With more parity between the major players, sight-unseen trades continue to escalate this 2008 campaign, making a powerful market statement and generating even more heat. Over 327,000 slabs have been traded sight-unseen on the CCE network, and the ravenous demand for certified material has not been satisfied. Virtually every collector, especially the newer enthusiast, can't think of a time not having their coins in a slab. It just seems natural that this generation's coin culture mandates third-party grading and encapsulation. Given the volume of business and stringent grading standards, the liquidity of this product can't be underestimated.

Classic Silver Commems are easing back a bit, although none are loosing over 5%. While Spot Silver has gotten the cold shoulder, Morgan mania still exists, as buyers are not yet top heavy. NGC Peace Dollars feature a little action as the better 1922S tops $1,100 for MS65 examples, and the tougher Denver Mint counterpart claims $900 for MS66 material. Mint State and Proof Type hold a tight ship as no one is bailing out here, and the 5-member tribe of Copper-Nickel Indians are holding counsel as PCGS MS67 specimens arrow up to $4K. Even though Spot Gold has drifted below $810, we only feature a scattering of minor losses with MS62 $20 Saints showing the least mercy, easing back to $915. Gearing up for the new 2009 High Relief promos, the original 1907 model is taking NGC MS66 slabs all the way to $70K. This soon to be available coin has already garnered the nickname "Meow Mix" for its roman numeral date of MMIX. How about that numismatic humor? Leaving money on the table, Franklins continue to sell by the boatload at retail auction for below sight-unseen Bids by as much as 43%. Go figure. Generic Type II Buffalo Nickels have increased and are now at $65 in MS66. This may very well be related to promotions involving the hugely successful pure Gold fractional Buffalos that were just released. Hold onto your running shoes. Walkers are making a mad dash as over 50 from this popular series sprint to double-digit gains. The 1943S NGC MS65 and 1945S PCGS MS66 are each reeling in 50% advances. On the dollar level, hands down the winner is the $1,000 advance chasing 1928S NGC MS66 examples to $10K. No doubt, these higher sight-unseen Bids will flush out this much needed material.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 50,000 coins with an estimated value of $300 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

Southern Exposure Confirms Market's Grit
Minimal Damage From Metal Meltdown

Summer's heat is still very much on for all in play within the numismatic arena. There is seemingly no playbook any longer, and certainly no time-outs in this non-stop market. Why should this week be any different? Many of the country's prominent dealers and the hobby's collecting faithful have taken on a southern sojourn deep into Dixie. Sultry Atlanta is the scene as the highly competitive and informative Whitman Coin & Collectibles Expo is underway. Dealer set-up on Wednesday had an enthusiastic turnout as early birds were flocking in mid-afternoon to swoop down on any fresh deals. The mood may have been a bit tentative and dulled due to the recent metal meltdown, yet most buyers came ready to rummage and deal for the precious early certified cargo that has kept this market driving at nearly full throttle. Those we caught up with still had Flowing Hair, Draped and Capped Bust Type material in their sights. All denominations were welcome, and most attendees confirmed they were still willing to dole out premiums for problem-free examples. Yet, if a coin wasn't 100% there, and then some, buyers were turning away. As one well-known dealer confided, "It needs to give me goose bumps, or I'm out." Considering the oppressive heat and humidity at this venue, that could be a tall order. Early Gold Type was pursued vigorously, and perhaps apropos, Dahlonega and Charlotte strikes had very active buyers. A host of enthusiastic participants were also taking in the Decatur sale by Stack's (still in progress as we go to press), hoping to pry some fresh certified material loose at prices within this galaxy.

A clear area of action this week is in the Morgan camp. Buyers still love this stuff, and in spite of the fact that Spot Silver tarnished quite rapidly, Morgans haven't spoiled the appetite of seasoned buyers. Certainly, large volume buyers don't have the jitters in the wake of the white metal's plunge. The big money is still very much in the game, and those that still want in are busy attempting to cash out duplicates and lesser slabs that are not PQ, all anxious to latch onto the rarer and eye-appealing coins that everyone is in a conga line after. Unquestionably, rare and top quality pedigreed slabs continue to thrive, even if they're recycled plastic. Doing their bit for the environment, a superb NGC PR65 1844 Liberty Seated Dollar pedigreed to Pittman/Kaufman sold at a Heritage internet only auction on 8/19 for an impressive $83,375. Déjà vu? Maybe for the under-Bidder, as the same coin appeared at the FUN Auction in January 2008 where it realized $74,750. Another example seen in cyberspace in the same outing was a solidly graded NGC MS63 1859C Half Eagle, first seen flying out of the Feb '08 Long Beach sale at $29,900 only to claim $34,500 during that August 19 internet only event. This is a perfect illustration of just how strong this market is today. The equation is quite simple. If a coin is rare, has a pedigree and pizzazz, a ready buyer is often waiting, and paying higher levels.

Though summer is clearly not over yet, the new fall season is just a few weeks away. Those scrimmaging will have to turn it up a notch as serious play begins in earnest in September, with the Long Beach Expo coming right up. Those not able to partake in the southern hospitality were no doubt flailing away at one of the electronic trading networks looking to cash in or cash out some expendable slabs. Classic Silver Commems spot only a handful cutting class, and then it's only the 1921 Alabama surrendering over 5% as PCGS MS64 slabs slide to $410. Classic Gold maintains decorum with buyers, serving up zero bargains this time. Though Morgan and Peace Dollars are generally strong, a few cartwheels were sold at retail auction for levels below current sight-unseen Bid as seen in this week's market columns. Several NGC MS64 examples that left money on the table include: 1878S, 1890S, 1899S, 1903, and 1921D. Also, a Peace Dollar dated 1926 and graded NGC MS63 traded for 20% below what dealers are paying for them sight-unseen. Walkers continue their run as select dates are up as high as 10%, while PCGS MS65 generics are currently Bid at $115, up 5% from last week. Within the Proof Type segment, Morgan Dollars grading PR63-PR67 are getting a nudge in the ribs as PCGS PR64s take a 9% bounce to a $2,400 blind Bid. Gold Type has a cautious yet optimistic following with only minor Bidding fallout noted, as Gold Spot rebounds to $833.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from ***wholesale*** trading networks' sell lists "on the floor" and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 50,000 coins with an estimated value of $300 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

1960 LVD_MLG DATE VARIETY

VARIETY DIAGNOSTICS
Hubbed first with a large date design, then hubbed again with a small date design. Doubling mostly on the inside of date especially on "960."

COMMENTS
This is a very strong variety that continues to gain in popularity. Its popularity will likely be maintained as the only mint state overdate known for the 1960 cents.

Coin Caravan Prepares To Motor West
No Seven Year Itch In This Market

Most professional dealers that we conversed with are still feeling rather confident as to the overall staying power of this numismatic juggernaut. This run is nearing its seventh full year, in what can only be categorized as an amazing bull encounter of the coin kind. Without a doubt, the triumphs due to hard work, patience, a keen eye and strong cash reserves have gotten many through to this point. Nonetheless, on the heels of the well received Whitman Atlanta Expo, most dealers have only a short time to fine tune strategies and do their homework for the west coast pre-Long Beach assault which begins in earnest the week after Labor Day.

Now, as the younger set prepares to go back to school, the same drill applies to most of the coin fraternity. Albeit on a more competitive level, the coin class of 2008 is ready to embark on another fall semester of Numismatics 101. Although there are no scholarships awarded on this campus, years of research and specialization goes a long way to pay the tuition. Many dealers that we have talked to about this strong certified coin market are finding it more difficult to compete and be successful for themselves and their clients. The ever dwindling supply of rare coins that are worth chasing after have all but disappeared from the market place. Phenomenal material is still marginally available at some major shows and auctions yet the prices being paid for such stellar standouts is taking a toll on buyers' bottom lines. Most dealers will not complain as the dynamic business that has been conducted this year (and backtracking for several more), has allowed many to amass substantial inventories and expand their client base. The overall colossal performance of precious metals during that same time interim have also enhanced their bullion based assets by as much as three fold since 2000. Tempered by a recent downward trek, virtually all Gold coins, bullion based and numismatic, currently have increased premiums attached to them.

In as much as world events and financial news haven't been all that kind so far in 2008, the rare coin market has still performed like a champ. Take a look at the *CCDN Coin Market Index*, if we backpedal to the period between 2006 and 2007 the *CMI* was virtually deadlocked, reporting in at around 895. Fast forward to this report and the index is showing solid growth at an impressive 928. This may confirm that many high powered buyers and affluent collectors are still charging onto the scene. Many of today's collectors are well versed and quite willing to hold these treasured slabs off the market for a considerable time. While want lists are updated and internet only auctions are scanned, the electronic trading networks are still an amazing option. Whether dealers are on the rampage for new slabs or anxious to jettison those undesirables to generate cash for upcoming deals this automated venue is just a click away. If one needs further corroboration as to the state of the certified coin structure consider this; at any given time hundreds of viable buyers are lined up with Bids equaling over a half billion dollars. Yes, the market is still a powerhouse with no evidence of a *seven year itch* to scratch.

Although Silver Spot has settled in to the $13.50 range, buyers are still fascinated with Morgans. While a quartet of commoners eases off a tad due to auction malaise, only a cursory handful has been spotted leaving money on the table. Peace Dollars are quietly maintaining the status quo. Classic Silver Commems are delivering only a few naysayers with the lowly Iowa statehood issue losing the most self esteem as NGC MS64 representatives roll back 13%. Taking the offensive, 1953 Washington-Carver Sets tack on 12% gains for PCGS MS64 offerings. Both 1948 and 1949 Booker T. Washington Sets graded PCGS MS65 claim higher Bids of $135 and $220 respectively. The Classic Gold players are featuring solidarity as sellers aren't willing to let any of the miniature golden treasures fall off the stage. Mint State and Proof Type aren't having any fire sale as buyers look to scoop up all they can get this close to the Sept. 18-20 Long Beach Expo. Gold Type, although not beaming, appears to be on the rebound as only minor rollbacks are seen. In fact $5 Libs are actually inching up in MS62 as are $20 Saints, now Bid $940 sight-unseen.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 50,000 coins with an estimated value of $300 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

So Cal Hosts Auction Battleground
Metals Still On The Rocks

Nothing motivates true collectors more than competition. Regardless if the goal in sight is a modest certified, entry level Type coin or one of the six-figure persuasion, this new generation of coin aficionado is having a difficult time just locating those fresh, problem-free coins. Dealers returning from a brief holiday concur with that sentiment while they labor over aging want lists and attempt to spruce up inventories for the fast approaching September sojourn to the Golden State. Although a lot of certified material is out there in cyber-land, much of that plastic has made the rounds more often than a peanut vendor at a baseball game. Yet for those doing their homework, the various weekly internet only sales do offer up a bargain or two for the novice collector or professional buyer. For example, generic Buffalo Nickels have been regularly selling at retail auction for levels below sight-unseen wholesale Bid, as seen in the chart below. While the dollar amount may not be huge per coin, a savvy buyer could make quite a profit by purchasing and reselling quantities. Theoretically, flipping just 10% of the PCGS/NGC population would result in a potential profit of nearly $34,000 at these levels.

Most of the newer numismatic crowd is well-schooled, patient and doesn't mind toiling long hours to attain their goals. On the flip side, many of the cash heavy elite investor types that are used to immediate gratification are not as willing to wait. As a result, competition has become quite combative at major auction venues. Well-known dealers we talk to regularly confirm that many of their well endowed clients have authorized significant Bidding latitude when they tender offers on their behalf during the bevy of upcoming Southern California auctions. Even armed with extremely liberal Bids, these buyers know they won't come home with all they set out after. While no supply train of rarities exists, the professional coin hunter's job of tracking down the whereabouts of those coveted trophies has at least become easier. Although the exact pedigreed coin might not be on the market presently, chances are very good that one can chart the path of that specific rarity through recent public and internet auction appearances and registry sets. Highly detailed auction catalogs are also making the hunt for elusive coins a much easier proposition, provided that a given example has remained in its original third party grading slab. If not, identifying various diagnostics, courtesy of wonderfully detailed photography, will help do the trick.

So with cash and population journals in hand, many self taught collectors along with a dazzling array of professional dealers have booked passage to the west coast to do battle. Not withstanding the massive volume of business already conducted this year, there is obviously still a large void that needs to be filled, and cash is waiting on the sidelines ready to pour in. With no fewer than four major auction houses offering up tens of thousands of certified coins from September 13-21, those in the market for superb Type or extreme rarity will have their shot. The Bowers & Merena Rarities sale will get the auction ball rolling on the 13th in Beverly Hills, and running concurrently, will also be fielding Bids for their Collector's Choice sale which will conclude on 9/17 at their corporate location in Irvine, CA. One of Escala's other subsidiaries, Teletrade, is also enticing fresh consignments by offering free PCGS or NGC grading on any raw coins submitted that realize $250 or more in one of their tri-weekly internet only events. Heritage is offering a similar program for ICG slabs through the month of September. For those not quite ready to run that west coast gauntlet, dealers will weigh their options, including the electronic trading networks. These venues have been a hotbed of activity. As a matter of record, it seems more and more sight-unseen trades are being recorded for dated Gold. Just in the last few weeks, $42,450 traded hands for 14 dated Type III $20 Libs grading MS63 and MS64. An 1862 $2½ Lib grading PCGS MS63 also traded sight-unseen for $7,800 through the Certified Coin Exchange last week. Interestingly, the last time a coin in this grade traded publicly was during the previous Long Beach signature sale on May 29th when a specimen pedigreed to the Bass collection realized $6,613.

Even though Spot Silver has drifted below $13, generic and scarcer Morgans are still desired in quantity. Several of the common ranks in the uncommon MS66 grade are also sparking ahead. Leading this escapade is the 1884 taking a 25% advance to a $500 sight-unseen Bid. Peace Dollars are once again playing the silent type with none offered up in the bargain bin. Classic Silver Commems are surprisingly quiet as only a trio of easily replaced examples are sliding back a trifle. The Classic Gold contingent maintains Bidder integrity as the golden Americana gets the vote from buyers. While the yellow metal is still on the rocks and struggles to stay north of $800, most Gold Type has gotten the cold shoulder, although only minor setbacks for most are observed. Type III $20 Libs grading MS64 are actually mustering up a gain, topping off at $1,600 blind Bid. ICG MS67 $20 Saints break away with a solid 25% advance, topping $5K. Mint State and Proof Type continue to be vetted by buyers as no one is willing to let any fall through the cracks with ANACS Capped Bust Halves and Trade Dollars each fashioning a nice move in MS63, rising to $900. Although fall is fast upon us, the mercury is rising for over 3 dozen Full Banded MS65-67 NGC Dimes from 1937 on. A dozen of them are each sporting double-digit advances. ICG slabs also get in the act as a swarm of later entries claim higher Bids in MS65FB and better. Walkers are back in the mix as both key date and commoner ANACS and ICG material move up a few rungs.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 50,000 coins with an estimated value of $300 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

To learn more about the big difference CAC coins can make in your collection visit **CACcoin.com.**

Gold On Longest Losing Streak Rarities Still Have Muscle

Early rarities, key dates and eye-popping Type continue to sustain this powerful market. Although many dealers are waiting for the other shoe to drop, no one has really gotten trounced yet (with the exception of pure metals speculators). However, as Gold Spot seems to be sliding in unison with the oil market, some resolute buyers are actually informing us that now is actually a good time for them to scope out some better certified Gold Type. Indeed, the yellow metal has been headed south for a record number of consecutive days. The last time such a losing streak was close to this long was back in 2001 when it lasted 8 days. Gold has lost $262 per ounce from its mid March peak and has dropped 24% in the last eight weeks. But, it isn't all that bad when keeping in mind that Spot is still some $30 higher than it was a year ago. It's all a matter of perspective. A year ago, MS61 Type III slabbed $20 Libs were Bid sight-unseen at $750, now blind offers are at $870. Melt value for Double Eagles was $689, equaling a 9% premium for $20 Libs in MS61. Now the premium has escalated to twenty one percent. $20 Saints in MS62 were Bid at $775 vs today's $875. Even MS65 caliber material is Bid higher, now at $1,250 from $1,100 then. So on the heels of this golden retreat of significant proportions, the numismatic parachute has softened the otherwise hard metals landing.

Currently, a multitude of numismatic notables are descending on California's southern shore. Many dealers have tried to get a leg up on the fertile competition by conducting pre-pre-Long Beach business. Top tier certified rarities and eye-out-of-the-socket Type coins are still being consumed at record prices when they appear, and more of the same is expected at the Long Beach Expo, set to begin on 9-18. Auction lot previewing via catalog and internet for the thousands of certified coins has already gotten dealers and collectors salivating as they are expecting a three tier circus. Coins that are all there and possess pizzazz, rarity and pedigree will have the afterburners attached to the winning Bids. Those that just miss the mark may find homes at reduced levels, yet the average drek will likely languish and will probably be doing a stint in a later auction. Week in and week out, many Buffaloes, Mercs, Walkers and Franklins have continued to trade under the blind Bidding radar on internet-only events. Yet even this highly competitive alternative venue is clicking home some powerful prices. Take the 1805 Large Cent graded PCGS MS62BN appearing in Teletrade Auction this week. Housed in an Old Green Holder, this attractive coin brought $14,400. If you have any lingering doubts that key dates are surging, consider that during the Heritage Rosemont sale on April 15, 2008 an 1878CC Liberty Seated Half, graded PCGS AU58, went to a floor Bidder for $10,350. Now, less than five months later, the exact same coin emerges in Teletrade's 9/8/08 auction where the cyber highway event saw this classic Carson City coin skyrocket to $16,700, for a 60% increase over its Illinois appearance. Rarity obviously has muscle and will find a home. Even the various electronic trading networks have seen heightened activity lately. While the metals fall off a cliff, CCE Generic Big Market has already seen volume increase as nearly $670K has been transacted in $20 Gold and Silver Dollars in the first three days of trading this week. While Silver Spot is trading at $10.49 an ounce, which is $2.18 less than a year ago, MS65 Morgan Dollars are Bid 28% higher at $128, compared to last year's $100 Bid. Morgans are currently holding more than their own with only minor rollbacks in the generic category from last week. Proof Like Morgans deliver a little action too, as the 1901O rides a 13% hike for PCGS MS63 offerings. Peace Dollars are powering up too. Commoners in Very Choice through MS66 are inching higher as are several keys in Gem. Leading the MS65 march is the 1928 as NGC product lays claim to a double-digit advance to $2,000, and both versions of the popular 1923S entertain a $3,250 blind offer. Mint State and Proof Type are still basking under a Bidding blast with none dissenting. As we referenced earlier, several Type II Buffalo Nickels and Full Banded Mercs escaped the auction auspices leaving as much as 40% on the table in the case of 1941D & 44D PCGS MS66FB offerings. Walkers are taking a few baby steps for some easier to acquire material, yet a pair including the 1943S PCGS MS66 from the short-set each lost over 20% after sight-unseen transactions were recorded.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 50,000 coins with an estimated value of $300 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

The Next Generation
Coin Holder from NGC

NGC is proud to introduce the most rigorously tested coin holder ever developed.

The new NGC EdgeView™ Holder ensures the ultimate in security and protection for your coins. We've incorporated cutting-edge features, including a micro-printed label with a UV watermark, and an **advanced-technology** hologram fused directly onto the back of the holder — that is virtually impossible to reproduce. Directional pressure welding cleanly and completely seals your coin inside the holder.

The unique materials employed are identical to those tested, and now used, by the **Smithsonian** in their NGC-developed museum holder that houses the National Numismatic Collection's most valuable coins. Plus, NGC's lauded **EdgeView** design suspends the coin within four cushioned prongs to showcase its edge and enhance the overall presentation.

Hobby-leading innovation — just another way we demonstrate our rare commitment to numismatics.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflike. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Gold Spot Delivers Record One-Two Punch
$25 Million Hammered As Long Beach Commences

In the face of fiscal mayhem and deteriorating confidence on Wall Street, the mood is surprisingly upbeat in the certified coin arena. The Long Beach experience is at full throttle as government intervention has given an indirect boost to the numismatic front. A day after the Fed stepped in to bail out faltering insurance giant AIG to the tune of $85 billion, Gold Spot made a historic and unprecedented move. After closing at $777 on 9/16, the golden express hit the afterburners, rocketing to $847 in the biggest one day jump in history. Clearly, the yellow metal is considered a safe-haven for cash in this volatile marketplace. This trajectory continued as Spot reclaimed over $915 in intraday trading, and closed at a hearty $893 on 9/18. Trading in this neighborhood has not taken place in nearly seven weeks. Silver has also made a powerful comeback, closing at $10.46 the day before the bailout, then vaulting over the $12.60 barrier Wednesday.

Leading up to set-up day at Long Beach, a quartet of pre-gala auctions are in the books accounting for over $25 million. The Goldberg's diverse and eclectic sale took in the lion's share at over $18 million. Early fresh Copper was red hot as 10 prized Half Cents and Large Cents from the auspices of the Ray Rouse and Ted Naftzger collections reeled in an amazing $2,535,750. Prices for these historic and phenomenal Coppers went through the roof as collectors and dealers battled for many of these finest known certified treasures. Rare Early Gold was also a bell ringer as six-figure mania was in force. Those key dates and fresh original Carson City Silvers came away big too, as Superior Galleries was the scene for an 1876CC Twenty Cent piece graded PCGS MS62 taking a wild ride to $264,500. Another CC delicacy, 1872CC Liberty Seated Half, also PCGS MS62, rolled to $100,625. Apparently having no or few reservations resulting from the current state of economy, many dealers that were shut out during the pre-event sales have their sights trained on the Expo and Heritage auction. Knowing that cash isn't the problem, the mission is just to locate any new deals first and make some purchases. The feeling on the bourse during set-up day was one of cautious optimism. As the expo's doors opened, buyers went frantically searching for anything with a hint of freshness. Those taking a timeout to converse with us confirmed that a very exciting atmosphere permeated this bourse. The usual targets were also articulated to us by dealers, as they were still searching the tables for original, problem-free early Type. One well-known buyer just shouted "Gold!" as he had want lists that included material from early rarities to generic Saints. One dealer broke away from the buzz to inform us that Morgan Dollars were his target, especially key dates in Gem and better, and a slew of DMPLs. Another specialist confided that Proof Gold was top priority for him, with accent towards Eagles and Deep Cameo $20 Libs. Early Copper, especially Large Cents, are very hot right now, but only if the coin measures up. When it does, buyers know that stiff competition and record prices will likely ensue. Dated Gold, Liberty and Indian designs, are strong as are Saints in top grade. Other dealers were huddled with their laptops making sure to protect their Asks on the various electronic trading venues in this rapid fire market. Sight-unseen action in the Mint State Gold Type sector has been moving fast and furious. Several within the Classic Silver Commem segment are offered at a discount. Dealers are still anxious to sell off the expendable material for quick cash in order to chase after the hot properties. Morgans deliver some action as high-grade NGC MS67 product finds commoners bouncing up to $720. Mint State and Proof Type finds no bargains as the Copper mania continues with sundry Large Cents and Flying Eagle Cents taking flight. This demand for Copper has shadowed the Proof contingent as popular Matte Proof Lincoln Cents display a push for Full Red Gems. Franklin Halves are picking up a double-digit endorsement as the 1949 claims $175 for NGC MS66 examples. Proof Franklin Half Singles are showing some increases this week as well. Heritage's signature sale is in full swing as we go to press, having already reeled in over $2.5 million after their first session.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A LITTLE STICKER MAKES A BIG DIFFERENCE.

Actually, it's smaller than a coffee bean. But the impact it's having on the coin market is significant. Coins bearing the CAC sticker are bringing notable premiums at auction. Not surprising, since CAC coins are considered, at minimum, 'solid' for the grade. In just a few months, CAC has authenticated 50,000 coins with an estimated value of $300 million.

That's what happens when you bring an idea whose time has come to market. Only coins that meet our strict standard earn the CAC sticker. We believe so strongly in the value of CAC quality coins that we have capital commitments upward of $25 million for the sole purpose of making markets in our product.

To learn more about the big difference CAC coins can make in your collection visit **CACcoin.com.**
